

**GOVAN—Greater Ohio Vascular  
Access Network Event  
Wednesday May 8, 2019**

Matthew Ostroff began his career in healthcare as an Emergency Medical Technician on September 11th 2001 in NYC. He went on to become a NYC 911 Paramedic for six years completing his career earning the 2006 NYC Paramedic of the Year. From the streets he stepped directly into the Emergency Department as a registered nurse at Mount Sinai Hospital. It was here that he would discover his true passion, vascular access. Working with the Director of Ultrasound he honed his skills with peripherally guided ultrasound IV access, and later went onto become a PICC line specialist initiating programs at NY Methodist hospital, Hoboken University Medical Center and an award winning hybrid ultrasound guided bedside vascular access program at St. Joseph's Regional Medical Center specializing in pediatrics and adults. After earning the "Outstanding Graduate Award" from Drexel University in the Adult-Gerontology Acute Care Nurse Practitioner Track Matthew advanced his scope of practice working under the Chairman of Surgery. Matthew has had the privilege of sharing his vision for vascular access speaking throughout the US, Canada, Latin America and as the Keynote Speaker at the 28th Annual Association for Vascular Access National Meeting

**Title: Protecting Your Patient and Vascular Access  
Devices From "Sticky Situations"**

To register, log on to [govan8.wildapricot.org](http://govan8.wildapricot.org):

GOVAN Members—Free  
Non-Members—\$20

**Objectives:**

- Review today's patients and their vascular access challenges.
- Define the components and characteristics of tissue adhesives.
- Describe the purposes of tissue adhesives when used with VAD's through case studies.
- Analyze the financial benefits of the vascular access specialist having a complete tool kit.
- Discuss the future possibilities of Vascular Access
