6:15 PM Educational Presentation

7:05 PM Q&A with Michelle DeVries

7:30 PM GOVAN Closing Remarks

Meal Provided via GrubHub Delivery

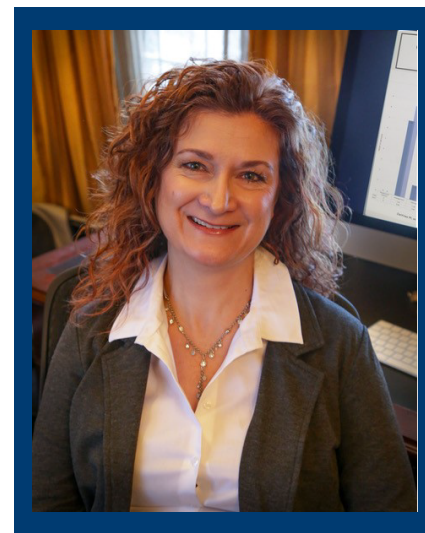

Email with details will be provided one day prior to event

### Program Description

Every five years, the Infusion Nurses Society has committed to releasing the *Infusion Therapy Standards of Practice*. This presentation will highlight a few key evidence-based standards for the profession. While the science of infusion therapy is rapidly evolving, unresolved issues or gaps in practice persist. Quality improvement projects of both small and large scale have the ability to improve practice locally. In addition, when published they can influence these best practice guidelines. A quality improvement project, including review of 18-months of audit data, will be discussed.

### Learning Objectives

- Review some key recommendations in the 2021 *Infusion Therapy Standards of Practice*
- Define the opportunity for influencing the next standards with the work occurring in programs today
- Review a quality improvement project through the context of the current and previous standards
